

# KÉVIN BIDET

## React-Native & React Developer

---

### About

As a freelance developer specializing in React Native and React, I have assisted numerous clients with their projects. More details are available on my website, [kevinbidet.me](https://kevinbidet.me).

My role encompasses two main aspects: development and providing technical advice.

I am seeking freelance opportunities in a company where I can be a significant contributor and offer comprehensive support.

### Technologies

- React-Native
- Typescript
- Next
- Reanimated
- Lottie
- Git
- React
- Javascript
- Expo / Eas
- Redux / Sagas
- Jest / Cypress
- Github / Gitlab

### Experience

#### **CityScoot, October 2023**

*Freelance React-Native Mission - Remote Work*

In this role, I was responsible for the development of new functionalities, along with the testing and debugging phases, to enhance the application's user experience. I focused on optimizing performance and ensuring the stability of the application, demonstrating proactivity in advising on technical choices for the company.

#### **Dev-Id, August 2023**

*Freelance React-Native Mission - Remote Work*

My intervention consisted of a detailed debugging and refactoring to improve the application's maintainability and performance, as well as unblocking the development at the stoppage of the application.

#### **L'École de l'Internet, July 2023**

*Freelance React-Native Mission - Remote Work*

On the Skwash project, I carried out minor refactoring and optimized the mock-up in addition to numerous animations. This work also included refining the design and ergonomics of the application, thereby reinforcing the visual and functional coherence.

#### **Lapsus, February - May 2023**

*Freelance React-Native Mission - Remote Work*

I was actively involved in the development of key functionalities, the implementation of rigorous testing, and the refinement of technical aspects to optimize response times.

# Expertise

- Full transfer of a codebase from JS to TS
- Installation and creation of End to End, functional, and unit test batteries
- Deep debugging of an Expo / AES configuration
- Navigation overhaul
- Implementation of development and production processes
- Creation of animations
- Technical advice in a small team setting for company decision-making
- Deployment on app stores

# Language

- French
- Korean
- English
- Spanish

# Loisir

- Korean Culture
- Sport (Combat - Bodybuilding)
- Reading

# Education

## **Epitech Toulouse, 2016 – 2021**

Master in 5 years with the title Expert in Information Technologies

## **Chung-Ang University Seoul (South Korea)**

International exchange program for one year

## **Lycée Saint Joseph La Salle Auxerre, 2011 – 2013**

2-year BTS in International Trade

## **Reev, January - October 2023**

*Freelance React-Native Mission - Hybrid*

Solo piloting of the development of the mobile application, from conception to publication on the stores. Close coordination with teams to efficiently integrate new functionalities and ensure an optimal user experience. Proactive in providing technical advice on decisions for the company.

## **May Santé, 2021 - 2022**

*Lead Developer Mobile - Remote Work*

As a Lead Mobile Developer, I was responsible for creating new functionalities and the integration of navigation for the May-Santé application. I ensured the transition of the codebase from JS to TS. A test battery was created to guarantee fluidity and quality. Animations and redesigns of the design system were also implemented.

## **Juloa, 2020 - 2021**

*Developer React & React-Native - Onsite*

As a developer specializing in React and React Native, I played a key role in the development of mobile applications at Juloa. My work focused on the elaboration of a codebase across mobile and web platforms, ensuring coherence and efficiency in development. I also conducted numerous tests with Jest to ensure the quality and reliability of applications.

## **MyRookie, 2019 - 2021**

*Freelance React-Native Mission - Remote Work*

Development of a mobile application and a Back-Office, as well as site integration in React Native at MyRookie. I executed the mockup integration and key functionalities, all while working efficiently remotely from abroad.

## **MountNpass, 2018 - 2019**

*Developer React-Native - Onsite*

Mobile development within an experienced React Native team. Active participation in the development and functional improvements of the itinerary and content of a map application, as well as the application of mockups. The app was published on the stores within six months.
